ARIOSO

Respiratory Care
and Rehabilitation

An Innovative Approach to Pulmonary Rehabilitation

The Arioso respiratory care program keeps up with the most up-to-date COPD therapy and modalities to ensure the best evidence-based practices are used. Our team is overseen by a physician and is comprised of on-site respiratory therapy, nurse practitioner, trained nurses, dietician, discharge planning/social services, and physical/occupational/speech therapists.

Program Features:

- Specific protocols for the management of Chronic Obstructive Pulmonary Disease (COPD), pneumonia, emphysema, asthma, and other respiratory diseases
- Consultations by board-certified Pulmonologist
- Evaluation and treatment by on-site certified Respiratory Therapist
- Specially-trained staff in COPD
- On-going patient and staff education
- Pulmonary function testing including the Six-Minute Walk Test

Our Arioso Respiratory Care and Rehabilitation care program strives to enhance the patient's quality of life and patient compliance through education, family involvement, and quality medical support on site and at home.

Support and empowerment are shown to significantly improve patients' outcomes and quality of life.

Our custom program keeps up with the most up-to-date therapies and modalities to ensure that the best evidence-based practices are used.

Upon admission, all patients are risk assessed for rehospitalization. With this assessment, we create a custom-care pathway to support the patients' changing needs.

Our team consists of on-site Respiratory Therapy, consulting Physician, Nurse Practitioner, trained Nurses, and Physical/Occupational/Speech Therapists.

On site assessments of the patient can be done prior to hospital discharge if requested.
